To whom it may concern:

My neighbors and I collectively have lived on Clinton Drive since our townhomes were originally built in 2004. We have seen the neighborhood grow exponentially in this time frame. There has been very little turnover on our side of the community due to our love and appreciation for EaDo and what the city has done for the area. We are filling a non-acceptance application to own the street directly behind our houses (Meadows Street, North of intersection of Clinton Dr and Meadows Street) in the hopes of taking it back for our community. Over the years, we have seen this track of land being used in various unacceptable ways. First and foremost, not being maintained on a regular basis. Overgrown grass, weeds and the occasional small trees reside there. It has created cover for individuals to use in order to case and at one-point break into one of our own homes during the night. Thankfully no one was hurt, however it does create concern for me and my neighbors. Secondly, the area is also used as a dog park/area for dog owners to use for their pets to relieve themselves. As the weather heats up, the large amount of dog waste in the space does cause pretty bad odors at times. Overall, if our application was accepted, we could take over this space, maintain it on a regular basis and also fence it in to deter individuals from crime in our community.

Thank you for reviewing our application and we hope to hear from you soon.

Sincerely,
Ultra Community
